

## **Job Title:** Junior Infrastructure Architect

**Job Location:** India / Hybrid / Remote

**Job Type:** Full-Time

**Company:** SORGJOBS HIRING PARTNER

## **Job Description:**

### **Overview:**

We are seeking a highly motivated and skilled Junior Infrastructure Architect to join our dynamic IT team. The ideal candidate is expected to have a strong educational background with a Bachelor's degree in Engineering (Computer Science or Information Technology) and certification as a VMware Certified Professional (VCP). This role is perfect for individuals looking to develop their careers in infrastructure architecture and gain hands-on experience in designing and implementing robust IT infrastructures.

### **Key Responsibilities:**

- 1. Infrastructure Design:** Collaborate with senior architects to design, develop, and maintain infrastructure solutions that align with the organization's goals and requirements.
- 2. VMware Expertise:** Leverage your VMware Certified Professional (VCP) certification to design, implement, and manage virtualization solutions using VMware technologies.
- 3. Technical Documentation:** Create and maintain comprehensive documentation of infrastructure designs, configurations, and procedures for future reference and troubleshooting.
- 4. Infrastructure Optimization:** Assist in identifying opportunities for infrastructure optimization and enhancement, including cost reduction initiatives and performance improvements.
- 5. Collaboration:** Work closely with cross-functional teams, including network engineers, system administrators, and security experts, to ensure seamless integration of infrastructure components.
- 6. Security and Compliance:** Ensure infrastructure designs adhere to security best practices and compliance standards relevant to the organization's industry.
- 8. Stay Current:** Keep up-to-date with industry trends and emerging technologies, making recommendations for their integration into the existing infrastructure.
- 9. Communication:** Effectively communicate technical concepts to both technical and non-technical stakeholders.

**Qualifications:**

1. BE / BTech - Bachelor's degree in Engineering, in Computer Science or Information Technology.
2. VMware Certified Professional (VCP) certification is mandatory.
3. Strong knowledge of virtualization technologies and VMware products.
4. Basic understanding of cloud computing concepts (e.g., AWS, Azure, or GCP).
5. Excellent problem-solving and analytical skills.
6. Strong communication and interpersonal skills.
7. Ability to work collaboratively in a team environment.
8. Willingness to learn and adapt to new technologies and tools.

**Preferred Skills** (not mandatory but advantageous):

1. Certifications in other relevant areas such as Microsoft Certified: Azure Administrator or AWS Certified Solutions Architect.
2. Familiarity with software-defined networking (SDN) concepts.
3. Experience with containerization technologies (e.g., Docker, Kubernetes).

**Benefits:**

- Competitive salary
- Health, dental, and vision insurance (Various from Company to company)
- Opportunities for professional development
- Friendly and collaborative work environment

Note: This job description is intended to provide a general overview of the responsibilities and qualifications required for the role of Junior Infrastructure Architect and may be subject to change based on the needs of the organization. The designation title might change from company to company.
